SUMMARY

Full Stack Developer skilled in building innovative, user-focused web applications. Experienced in front-end and back-end development, delivering high-performance solutions tailored to business needs.

SKILLS

- **Front-End** - Vue.js, React, Next.js, Three.js, TailwindCSS, SASS, TypeScript, JavaScript,
- **Back-End** - Express.js, Node.js, TypeScript
- **Database** - MongoDB, MySQL
- **Version Control** - Git, GitHub, Yarn, Npm

EXPERIENCE

- **Full Stack Developer & Team Lead | Global Expeditions SMC, London** (Nov-2023 - Nov-2024)
 - ➔ Led the development of a B2B web application designed for agencies to manage employee data and provide agents with a comprehensive panel.
 - ➔ The application features four distinct panels: SuperAdmin, CompanyAdmin, AgencyAdmin, and AgentPanel.
 - ➔ Utilized modern technologies to ensure a scalable and secure solution with optimized performance and user experience.
 - ➔ Coordinated with cross-functional teams to integrate advanced features and maintain high-quality standards throughout the development lifecycle.(Vue.js, Node.js, Express.js, MongoDB, Vuex, Ant Design, SASS)

PROJECTS

- **School Management System** - [Link](#)
Developed a complete school registration and management system for **Peki Senior High School** with student and admin portals, handling registration, payments, SMS notifications, authentication, and a complete database structure - **Next.js, Node.js, MongoDB, JWT, Tailwind CSS, Hubtle API**
- **Bank Website** - [Link](#)
Integrated backend to a banking platform with a secure admin panel, featuring authentication, blog management, image uploads and hosting, and language-specific filtering on front end - **Next.js, Node.js, MongoDB, Tailwind CSS**
- **LiveAutos - A car Listing Platform**
Enhanced a UK-based car listing platform by optimizing search functionality, developing multi-step car listing flow, and integrating UK vehicle data APIs. Developed multiple frontend sections and legal pages, advanced filtering, and detailed car pages, while improving responsiveness - **MERN**

- **B2B Agent Portal** - [Link](#)
Led the development of a Loyalty Program SaaS, enabling companies to offer points-based rewards to enhance customer retention. Oversaw a full-scale management system with Superadmin, Company Admin, Agency Admin, and Agent panels, implementing points tracking, redemption, and customer engagement tools to ensure a seamless and efficient rewards platform - **Vue.js, Node.js, Express.js, MongoDB, Vuex, SASS**
- **AI Startup Landing Page** - [Link](#)
Designed a sleek 3D landing page for AI startup, featuring a modern, high-performance layout to showcase AI solutions and engage clients - **Next.js, TailwindCSS, Typescript, FramerMotion**
- **Personal Project - Portfolio Website** - [Link](#)
Built an interactive 3D portfolio with optimized performance and engaging animations, demonstrating expertise in Three.js, React, and Framer Motion for modern web experiences - **Three.js, React, TailwindCSS, Vite, FramerMotion**

EDUCATION

❖ Bachelor in Computer Science | UMT, Lahore

CGPA: 3.1 | (present)
